

CMMS³ FOR
MICROSOFT AZURE™

Deliver the full potential of Microsoft Azure™ for easily deploy our CMMS³ on the cloud, assuring high availability of the application and the data

Microsoft Azure

Microsoft Azure is a registered trademark of Microsoft Corporation in the United States and/or other countries

UNALTERED EXPERIENCE TO USERS

CMMS³ ensures unaltered experience to users, whether it is deployed on-premise or through the cloud.

The application has been fully redesigned in order to host your entire application infrastructure in the Microsoft Azure™ - including databases, file-storage and staging areas

MAXIMUM SECURITY

Security is among the key concerns when a company considers shifting to cloud computing: this is why RAMCUBE has designed CMMS³ for Microsoft Azure™ on the principle of guaranteeing maximum security developing its compliance framework to fully meet regulatory requirements

REDUCED COSTS

Pay only for what you use: a pay-as-you-grow plan allows for reduced upfront costs.

By employing the full resources of cloud computing, CMMS³ for Microsoft Azure™ allows to cut costs of your on-premises IT resources. And administration costs are curtailed because the infrastructure maintenance is carried out for you off-premises

CONSUMPTION-BASED PRICING

Microsoft Azure™ pricing is consumption-based, with a per-hour fee based on the size of the instance and per-month or per-transaction fees for storage services on the basis of data size.

Application maintenance costs are cut dramatically: costs are charged only for computer processing time and storage space actually employed

START-UP TIME OPTIMIZATION

Waiving infrastructure and platform issues, your company focuses fully on development of application and functionalities: curtailing development time and significantly reducing your application's start-up time

GREATER SCALABILITY AND FLEXIBILITY

As your users base grows and the usage of your application increases, it is a simple matter of adding on capacity to ensure your application continues to run smoothly.

You don't ever have to worry about running out of server capacity. Application deployment to Microsoft Azure™ platform is utmost fast, ensuring implementation of changes with no downtime
